

Downloading Images from your Camera to the Computer

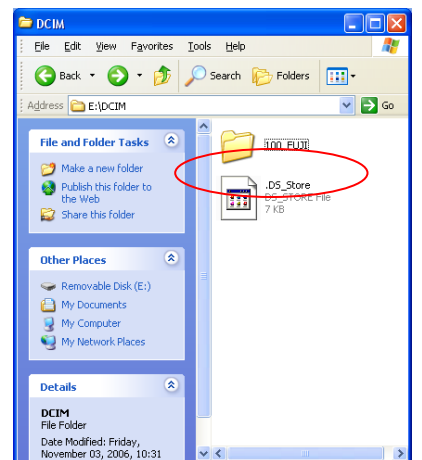

- Connect your camera to the computer using a USB cable or a Memory Card Reader
- Click “**My Computer**”
- Click on the “**Removable Disk**” (unless you have renamed it with another name)

- A window will open
One folder is named DCIM (**D**igital **C**amera **I**mage)
- **Double-click** this folder

- You will now see a folder with a camera name (Fuji, Canon... this folder name is generated by the camera that you are using. **Double-click** this folder to see your images.

- Now you can see your images. Drag these images to your desktop or create a folder with a name that you save them to.
