

Division 14 - Conveying Systems

Where passenger elevators and/or chairlifts are required, systems shall comply in full with all applicable building codes, regulations, Americans with Disabilities Act Guidelines, laws and ordinances, including both the technical provisions and the administrative guidelines of the State of Colorado.

Emergency (battery) backup power shall be provided, and all elevators shall be key-access only.

Elevator cars or enclosed platform chairlifts shall include audible emergency alarms and remote alarm signals to building administration office, in lieu of car telephones.
